Eoffice Release Note Version 1.6.0

Introduction -

The Eoffice is a flagship application, which is built completely on micro-services based architecture and is hosted on open shift containerisation platform. This architecture provides smooth operations and easy GUI changes as per the end-user requirements. **The application is aimed to digitise all the workflows related to Indian Navy tasks.**

Objective –

This user manual equips end-users with the knowledge and procedures to effectively manage all the **Files** and **DAK** within the eOffice system, facilitating streamlined and secure personnel-related processes

Incremental Build Features –

1. **Dashboard** - Introduced the eOffice Dashboard in Build 1.6, offering real-time insights, task tracking, and centralized management of document workflows and communications.
2. Resolved issues with file Dak count display in the Dashboard, Outbox, and Inbox, ensuring accurate tracking and real-time updates.
3. Fixed the issue preventing subject copy functionality for files and Daks in Inbox, Outbox, and Cabinet.
4. Implemented text wrapping for subject lines to improve readability.
5. Updated the "Create File" page to make the Directorate Code field mandatory, ensuring consistent and accurate data entry.
6. Implemented necessary validations across critical fields for improved data consistency and accuracy.
7. Resolved the issue where editing the subject in Noting and Enclosure sections was not functioning.

	Project Name: Eoffice	Ver. 1.6.0

8. Introduced a robust Admin Panel, enabling streamlined management of users, permissions, and system configurations for enhanced administrative control.
9. Implemented the super directorate concept.
10. Fixed pagination issues in the Inbox, Outbox, and Cabinet modules, ensuring smooth and consistent navigation through files and documents.
11. Implementation in initiate module of creation of draft file, draft dak , part case file and schedule.
12. **Collation cover workflow fixed** - Noting and enclosure of collation cover is received by recipient.
13. **Part case file workflow is fixed** - Duplicate of part case file reference number in different users.

Conclusion –

The Eoffice version 1.6 has been deployed in Dev environment.
